High school years should be, and usually are, among the happiest and carefree years of our lives. We cherish the friendships formed. We treasure the memories of happy occasions and important events. We remember certain teachers for their deep understanding of boys and girls, others for their insistence upon tasks and deadlines, and yet others for their sympathetic and kindly understanding of our problems and shortcomings.

The story of the high school yearbook is admirably told in picture book form in each high school yearbook. That is the real purpose of the publication. The efforts of the yearbook staff are directed toward one goal: The finest and most complete record of the current roster of pupils, and more especially of the January and June 1959 graduates, that the editors and other staff members can produce. To them and their sponsor, our thanks and appreciation for a job well done. A product that will be treasured by each graduate over the future years to come.

HEART OF THE CITY

Antoine de la Mothe Cadillac would probably be quite surprised if he were to look at the spot where he founded a tiny village in 1701. Today instead of tall stately trees the area is dotted with sky-ward reaching manmade structures. Animal trails have been turned to hard-paved super highways.

Detroit, originally a French settlement named Fort Pontchartrain, was incorporated as a town in 1802. Then in 1805, it was except for one warehouse completely destroyed by fire.

Out of the ashes of the old a new city was born. A city destined to become one of the largest and most important in the United States. It was modeled after Washington, D.C. Grand Circus Park and Campus Martius were to be the centers of the city with streets branching off like the spokes of a wheel.

Detroit like the United States is a melting pot. Twenty-five percent of its population of 1,838,517 is made up of foreign born people. Another thirty percent of Detroit's population is made up of people born in other states.

Located on the Detroit River between Lake St. Clair and Lake Erie, Detroit has become an industrial city. It is the automobile manufacturing capitol of the world. Strong, powerful, dynamic, famous for its automation and assembly lines; but Detroit is also a cultural city.

The Detroit Institute of Arts houses one of the finest and most complete collections of Dutch, Flemish, and Italian works in the country. The Museum has galleries of twentieth century French, German, and Italian art plus an unusual wealth of sculpture. Detroit has a notable symphony orchestra; it is considered one of the finest in the country.

Located within this great metropolis, serving as the heart of the city, is a building which symbolizes Detroit. It is an eight story building not very pretty to look at but dear to the hearts of people throughout the city and across the country.

Standing as a symbol of learning, achievement, education, and work, each day Cass Tech prepares citizens for the job of running their country in the future. Cass, like the city, is a combination of many races, creeds, and nationalities all working together on a smooth assembly line manner. Cass' students come from all parts of the city and its suburbs. They are willing to spend extra time and brave the inconvenience of transportation so they might attend Cass. Students give up their leisure time to study and work often wondering if it is really worth it. But when

they think of the better education, more exact training and the honor of a diploma they know it is.

Training at Cass is divided into several specialized fields centering around science and industry. The Auto-Aero Curriculum is one which is especially associated with Detroit. This Curriculum provides students with a basic all round education plus special training in the fields of air conditioning, refrigeration, automotive, and aeronautics. Students receive practical experience in the various workshops of the curriculum.

The Electrical Curriculum is another of Cass' specialized courses. This curriculum offers college credit and it also offers opportunities as jobs for apprentices, helpers, and journeymen. Some of the courses covered in the four year study plan are: circuit analysis, radio and television service, industrial electronics and applications, and power wiring.

Science is an important part of our world today. Cass has an excellent science curriculum. It offers more science courses than almost any high school in the country. The Curriculum offers six courses in chemistry, two advanced biology and several other courses.

All emphasis is not put on industry and science, though. Cass has ample room for culture. Its music and art curriculums have been acclaimed for their fine work. The music curriculum has several performing groups including the marching band, symphony orchestra, concert band, harp and vocal ensemble, dance band, and choir. The curriculum presents programs at school several times a year.

The art curriculum offers classes in design, art history and drawing. Art fairs and exhibits are held so that the students can display their work.

Another of the cultural curriculums is the Performing Arts. Its students take several classes in speech and stage craft and in addition help with the work for the semi-annual plays. Practical experience in building scenery and in stage production is obtained by working in the basement workshop. Last December the curriculum presented "The Heiress".

Cass' newest curriculum is Arts and Science. It offers accelerated classes in math and language for those who qualify. In addition to the specialized courses, Cass has classes in math, English, and history. These classes added to the curriculum subjects comprise a good solid educational background which is accepted as college credit or job preparation.

Cass is not all work and no play, however. The students body exercises its social wings at the dances, parties, concerts, and on the sports field. School clubs give students a chance to get together with people of similar interests.

On the whole Cass can be compared to a large house, and its students as one big happy family.

Cass is the heart of the city! Every day it beats with the energy of five thousand students preparing for the future when they will serve city, country, and self.

From Cass' doors walk the future of Detroit. Its graduates equipped with a better than average education leave with fond memories and the chance of a bright future. They will become the businessmen, artists, homemakers and scientists. They are Detroit as we are Cass.

We are our school. It is only as good as we make it. It will beat as the heart of the city only as long as we love it enough to put forth our best efforts. We can and should be proud of Cass; let us work to make Cass proud of us.

Retirements

MRS. MAE HEIMOWITZ

Mrs. May Heimowitz has been at Cass for only two years but she has endeared herself to students and teachers alike.

In forty years of teaching she has become well known as a little lady with a big sense of humor. Wherever she went her reputation spread and she became one of the best liked teachers. Her students always anticipated a well taught but enjoyable class.

In regard to her two years at Cass Mrs. Heimowitz stated, "I regret that it was such a short period of time. I have enjoyed my students and their work". They have enjoyed being in her classes also as many students around Cass can tell you.

In high school Mrs. Heimowitz chose to specialize

in a complete and extensive study of Latin. Altogether she studied Latin for nine years. Latin was her major field with mathematics and Greek as minors. Upon graduating from Hunter College in 1918 she came to Detroit and taught at Wilson, Burroughs, Durfee Junior High Schools before coming to Cass.

When she retires Mrs. Heimowitz plans to visit with her family in New Jersey and then make her permanent residence in Florida. As a hobby she is going to study art. "Who knows, I might become another Grandma Moses", she said laughingly.

Good luck in your future. We are going to miss you.

Mr. Raymond R. Jared, curriculum head of the science department, is retiring this June after serving at Cass for the past forty years. He is a graduate of Indiana State Normal College. Mr. Jared started his teaching career in Lafayette Indiana at the Jefferson High School. He taught physics for three years at this school. In the fall of 1914 he joined the staff of Garfield High School which is located in Terre Haute, Indiana. In December, 1917, Mr. Jared took a two year leave of absence from his teaching position to work as a civilian chemist for the ordinance department of the U.S. Army. In the summer of 1919, he resigned as a teacher at Garfield High School and began work as a chemist for the Lacawana Railroad which

was located at Scranton, Pennsylvania. In the fall of this year, he accepted a teaching position at Cass High School and was promoted to curriculum head in March, 1925.

Throughout the years, he has been active in such organizations as Phi Delta Kappa and the American Chemical Society. For many years, he served as the summer school principal at Cass and also headed up the science department in night school. Mr. Jared has a son living in Detroit, a daughter residing in Ann Arbor, and three active grandchildren. He has done post graduate work at Chicago University and received a masters degree in education from the University of Michigan.

RAYMOND R. JARED

HAROLD STORMZAND

Mr. Stormzand graduated from the old Cass Tech in January of 1920 and immediately enrolled for some post-graduate work in the Electrical Department and then in the fall began to teach a full program and has been doing just that ever since.

Mr. Stormzand got his education the hard way. That is by going to late afternoon classes and evening classes and on Saturdays. In that way he earned both a B.S. Degree and a M.A. Degree.

Mr. Stormzand was one of the pioneers in developing the electrical courses in the present Cass Technical High School. He taught every course offered in the Department and when radio was introduced at Cass then Mr. Stormzand was just naturally the one to develop the course.

In recent years Mr. Stormzand has handled most of the senior classes in the Electrical Departments as well as the senior home room. He has always had the reputation of being quite even tempered and rather easy-going but his seniors soon learned that he was not a man to be trifled with and they

all admired and respected him. Although most of his fellow teachers call him "Stormy" his students would never think of calling him anything else but Mr. Stormzand because he has always been the knid of man who commands respect without asking for it.

"Stormy" is also quite a talented actor. He took part in many plays that were put on by the old Dramatic Club of Cass Tech.

Mr. and Mrs. Stormzand have not fully decided just how they will spend his retirement but one thing sure they are heading south as soon as possible and expect to stay there for at least a couple of months and bask in the sunshine and maybe try and make some plans for the future.

One thing we can be sure of, "Stormy" will not be idle for long. He will always be active in church work and education and in just being a good friend.

We will miss you "Stormy" but we all hope that you and Mrs. Stormzand will keep healthy and we know you will keep happy for many years to come.

Benjamin G. Sutton, Chairman of the Physics Department at Cass since 1920, will retire in January, 1959.

After graduating from Adrian College and receiving a Master's Degree from the University of Michigan, he taught for five years in Ithica and River Rouge. Coming to Cass in 1920, he taught the first Physics classes and was soon promoted to Chairman of the department, the position he retained until his retirement. Mr. Sutton wrote the first Physics I Manual used at Cass and was a co-author of the first Physics II Laboratory Manual at Cass.

Mr. Sutton, one of the most popular teachers at Cass, was able to entertain a class and teach effectively at the same time. In fact, his students

were noted for their ability to apply principles and to work problems. So, after 46 years of teaching, Mr. Sutton has become more than a teacher — he has become an institution at Cass.

Mr. Sutton's wife, Lydia, a teacher for 30 years at Wayne State University and the High School of Commerce, has also retired in January, 1959.

They plan to move to Naples, Florida, where they have bought a house about two blocks from the Gulf of Mexico. He will devote his time to their investments and research work.

Even though he is a wealthy man, his greatest wealth will always be in the memory of his students and fellow faculty members. As a token of their esteem, the faculty gave him a Polaroid camera and held a luncheon for he and Mrs. Sutton.

BENJAMIN G. SUTTON

In Memoriam

Beatrice Cooper

"Bea", as she was known to her friends, was a devotee of the theater and had a flare for the drama and for life itself. Her attention to the dramatic arts placed her somewhat apart from the ordinary teacher and the everyday routine of teaching of academic subjects; however, her interest in teaching was manifested by a drive to present literature to the students in a manner that would create an interest that would continue long after the students' academic years. Her record of successful productions of student and faculty plays and skits will be long remembered by the faculty, students, and friends for their professional competence, variety, and staging.

She arrived at Cass Technical High School after teaching at several other schools and immediately plunged into dramatic work with a fervor that was to result in Cass being placed among the foremost in dramatic presentations for a high school. Her previous academic training at Michigan State University stood her well in her chosen profession. Bea inspired many Cass graduates to enter the dramatics field, and it was through her unfailing efforts and enthusiasm that the Performing Arts Curriculum was finally born.

Her passing was a shock to the many people in all walks of life with whom Bea came in contact. It came unexpectedly and only after a short illness. In contrast to the exaggeration and excitement of the theater, death came quietly to Beatrice Campbell Cooper.

ART

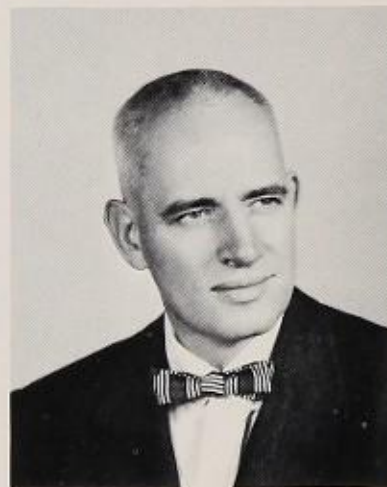

The Cass Art Department's three curriculums—commercial art, costume illustration and arts and crafts, prepare the talented student for an art career that often gains employment for him even before he receives his diploma. All students in the department take basic courses in drawing, painting, design, lettering and art history. Courses in illustration techniques, poster, graphic design, costume illustration, jewelry and other crafts are directed at the specialist in his respective curriculum.

If the student wishes to continue his education in art school or college, his training at Cass, which is in reality a college preparatory program including all the required academic subjects in addition to the subjects in his major field, enables him to tackle his program in higher education with confidence; he may even receive recognition in the form of advanced credit.

Reports of alumni successes come back to the proud Cass art teachers with gratifying regularity.

The Automotive, Aeronautical, Air Conditioning, and Refrigeration curricula have been planned to provide students with excellent training in mechanics, English, social studies, mathematics, mechanical drawing, physics, and chemistry.

All of these courses are becoming more and more necessary as our world advances in technology. When a student has completed the above courses, he is well equipped to know and understand present conditions and practices. The training will help the student readily adjust himself to industry or college.

The shop work in the Aeronautical Curriculum consists of hand tools, aircraft engines, airframes, welding, aerodynamics, aircraft engine testing, aircraft construction, meteorology, and navigation.

The shopwork in the Air Conditioning Curriculum includes the construction, installation, and servicing of domestic, stallation, and servicing of domestic, commercial, and industrial air conditioning and refrigeration units.

Driver Training for all students in the school is a part of the Automotive Curriculum.

ELECTRICAL

The electrical curriculum consists of four years of specialization in the field of electricity and electronics. Many of our graduates go to college and have made some very impressive records. For the pupils not interested in college, our curriculum offers excellent opportunities as apprentices, helpers and journeymen.

The principal fields covered in our electrical courses are: circuit analysis, including the national and local code ruling; radio and television service; theory and practice; industrial electronics and applications; power for both alternating and direct currents.

Our curriculum is based on a well planned foundation of English, mathematics, drafting, and science.

Much time is spent reviewing modern practices and present equipment and installation of various manufacturers and electrical contractors.

HOME ECONOMICS

The Home Economics Department has a three-fold purpose in preparing its individual members for immediate employment, happy and effective family living, and advance study in Home Economics or Nursing Education.

There are four curricula from which to choose: Dress Design — for the person interested in designing, making, merchandizing or teaching clothing or textiles; Institutional Foods — for the individual desiring to specialize in food preparation, commercially or educationally; Pre-Nursing Commercial — for anyone whose interests are in nursing or commercial work; Pre-Nursing — for the girl who wants to be a nurse in a hospital, industry or for public health. In this curriculum the student can combine the commercial training with the technical courses — This dual program makes possible direct employment as doctor's assistants.

MECHANICAL MANUFACTURING AND DRAFTING

The Mechanical Manufacturing Curriculum has been designed for those students who are interested in becoming mechanical or industrial engineers, automation technicians, or tool and die apprentices. Shop experience on such machines as lathes, turret lathes, shapers, milling machines, surface grinders, and universal tool and cutter grinders is offered, as well as shop and laboratory experience in foundry, drafting, metallurgy, physics, and mathematics.

The Mechanical Drafting Curriculum has been developed for those who are interested in becoming engineers, designers, or draftsmen.

The curriculum provides opportunities for all types of drafting experiences, leading ultimately to design problems. Foundry, machine shop, metallurgy, physics, and mathematics are other areas which round out the background.

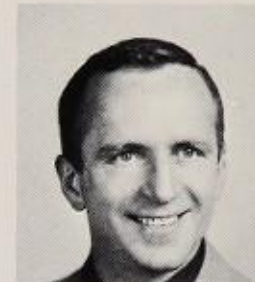

The Architectural Drafting and Building Curriculum provides experiences for the student in the drafting and building. Building construction details are assembled in the shop—plans are drawn up in the drafting room. The student ultimately can design a complete residential outlay and also be familiar with the building construction involved in the project. Supplemental courses in rendering, physics, chemistry, and mathematics complete the program.

MUSIC

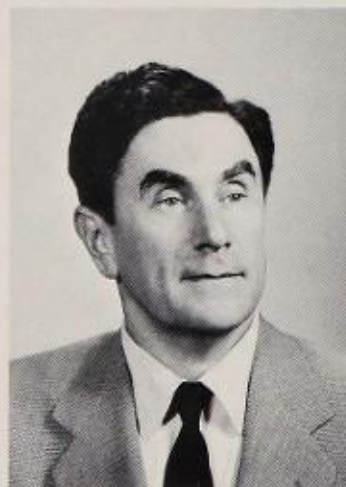

The fact that good music is traditional at Cass Technical High School is due in part to the special attention given to gifted students. Through a screening process on the day of enrollment, we are able to program the student so that his talents are given a chance to develop to the advantage of the individual as well as the school. The high moral of the Cass student body is due in no small part to the efforts of the Music Department. School spirit is an attitude toward the institution to which one belongs. We are aware of the spirit that exists at Cass when the music organizations appear in assemblies or for civic clubs.

Performing Arts

Students enrolled in Performing Arts are trained in the art of self expression. They are given courses in drama, radio, public speaking, stagecraft and script writing. As radio and television become more a part of the family recreation, the possibility of employment in the area becomes greater. Radio technicians, announcers, script writers and stage technicians are in great demand, not only by the commercial stations, but by the college stations as well.

Students who read well and have an interest in the theater, or related activities, should consider the performing arts curriculum. Graduates from this curriculum should be well qualified to enter the field of Liberal Arts.

MISS VIOLA KELLY

Polytech

MR. GLENN KLEPINGER

The Polytechnical Curriculum is designed for pupils who have followed a given special curriculum for at least three semesters and have decided to make a change. An opportunity is offered to the worthy student to undertake several types of work aimed at graduation and college entrance.

A transfer to the Polytechnical Curriculum must be approved by the student's parents. The request is then examined by the curriculum head and counselor. If they approve, the request is presented to the Polytechnical Curriculum Head. The student's records must show desirable work habits, cooperation in the practice of school rules and good attendance.

The reasons for a change to the curriculum must be valid. Graduation at the previously anticipated time is not a valid reason to change from a specialized curriculum to the Polytechnic, especially if the student has been doing failing work. Among the valid reasons for transfer are:

- 1) A frank recognition that the specialty previously pursued for three semesters is beyond the ability of the student.
- 2) A change in the desired career to be followed in college or work.

The requirements are:

- 1) a minimum of 170 hours of credit including the ninth grade credits
- 2) three years of English
- 3) one year of American History
- 4) ½ year of civics
- 5) ½ year of economics
- 6) 1 year of biology, chemistry or physics
- 7) 1 year of mathematics
- 8) 1 year of health education
- 9) A pupil must spend the equivalent of one school year in the curriculum before graduation.

PRINTING

The Printing Curriculum is organized to prepare young men for entrance into the printing industry at the technical level. It provides an opportunity for developing a broad knowledge and experience in the basic printing processes which are necessary for entrance and advancement in the various branches of the trade.

Our graduates are in responsible positions in typography, platen and cylinder press work, advertising, sales promotion, lithography, printers supply service, estimating, and other related activities.

what next?

It's a pretty important decision, young lady—choosing the work you'd like to do. You'll want to work in pleasant surroundings, in light and airy offices with modern equipment.

And now that you're out of school, you'll expect to meet new friends where you work—young people you'll like and with whom you can enjoy your leisure time. (And how about a vacation with pay?)

Then there's the matter of a paycheck—it's nice to have a salary that's good from the start and keeps getting better with regular increases.

There may be a job like this for you at the telephone company!

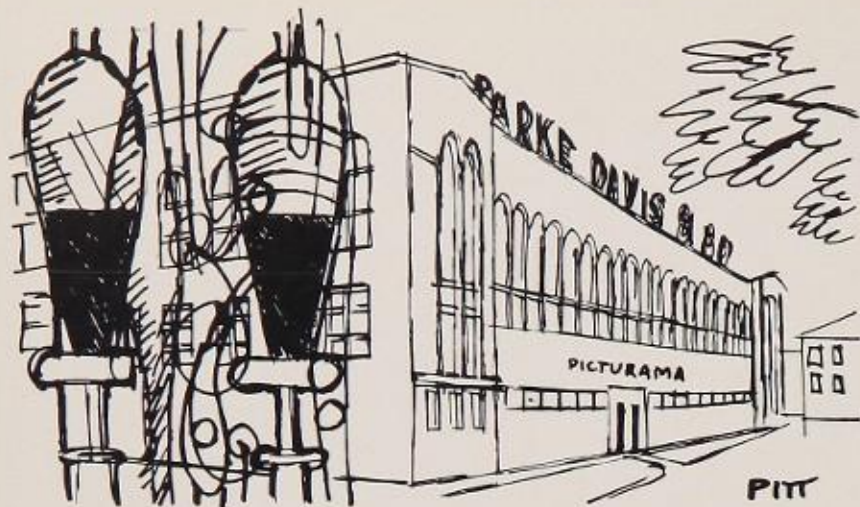

You might qualify as a telephone operator, or a teller, a cashier, or a clerk—those are just some of the many interesting jobs other grads from your school have found at Michigan Bell. And there's a chance to advance in every one of those jobs!

Telephone work doesn't demand previous experience, and it pays a good salary, even while a beginner is learning.

What next? Why not visit Michigan Bell's Employment Office? We'll be looking for you.

Science

Graduates of the Chemical Biology and Chemical Metallurgical Curricula may find employment in chemical or biological laboratories of the Detroit area as routine chemists or laboratory assistants. Colleges and universities welcome these graduates into the engineering and liberal arts college.

Few high schools in the country can offer as much or as many science courses as Cass. These are six courses in chemistry, two in advanced biology (microbiology and physiology and anatomy). There are also two courses in metallurgy, as well as elementary biology and physics.

**NOW
ENTERING
THE ERA OF
ALL-ELECTRIC
LIVING**

Today's graduates are entering an exciting new era where they will live better electrically in every way . . . at home, at work, or at play.

For example, if you choose marriage, you can enjoy an all-electric home. Included will be electric heat, built-in electric range and refrigerator and a host of time-saving, economical electric appliances. They will be the ultimate in modern living comfort and convenience.

Or, if you go into business, efficient electrically operated machines will assist you in getting the job done swiftly and easily—again an illustration of the versatility and dependability of electricity.

Or, if you go on to college, perhaps you will become one of the scientists or technicians who help further mold the all-electric world of the future.

No matter which path you may choose, electricity will be there to lighten your load, brighten your way . . . help you live better . . . electrically.

Hotdog anyone?

Smile please.

One of the big days in the life of a senior is Skip Day, when all seniors go legally skipping off to Belle Isle for hotdogs, mustard, gingerale and a swinging time. Held in the spring or fall, there is generally plenty of mud, which isn't much of a hindrance, and it's never too cold for bermudas.

Pays your money, takes your choice.

We don't mind rain.

Our Social Activities

Dances, along with clubs and games, round out Cass' social activities. The Basketball and Pigskin Prom are only two such events, and someone who has never attended one is really missing a great part of school life. It may be the first high school dance for some or one of the last for others. Yet, no matter how many we attend, the excitement is never lost and a good time is always to be had.

What about the Middle East Crisis?

Sportsmanship

Cass has always been known as a technical school stressing a difficult scholastic program. Never the less, Cass has always made a great effort in the fields of sports. Our team always put up a hard fight regardless of a loss or a win. Our sports-program does not end with the team though. It is the job of every student to back up their teams throughout the season. Our teams work hard. Let's appreciate and honor their work. Remember to follow all the rules of Sportsmanship and honor your school and team.

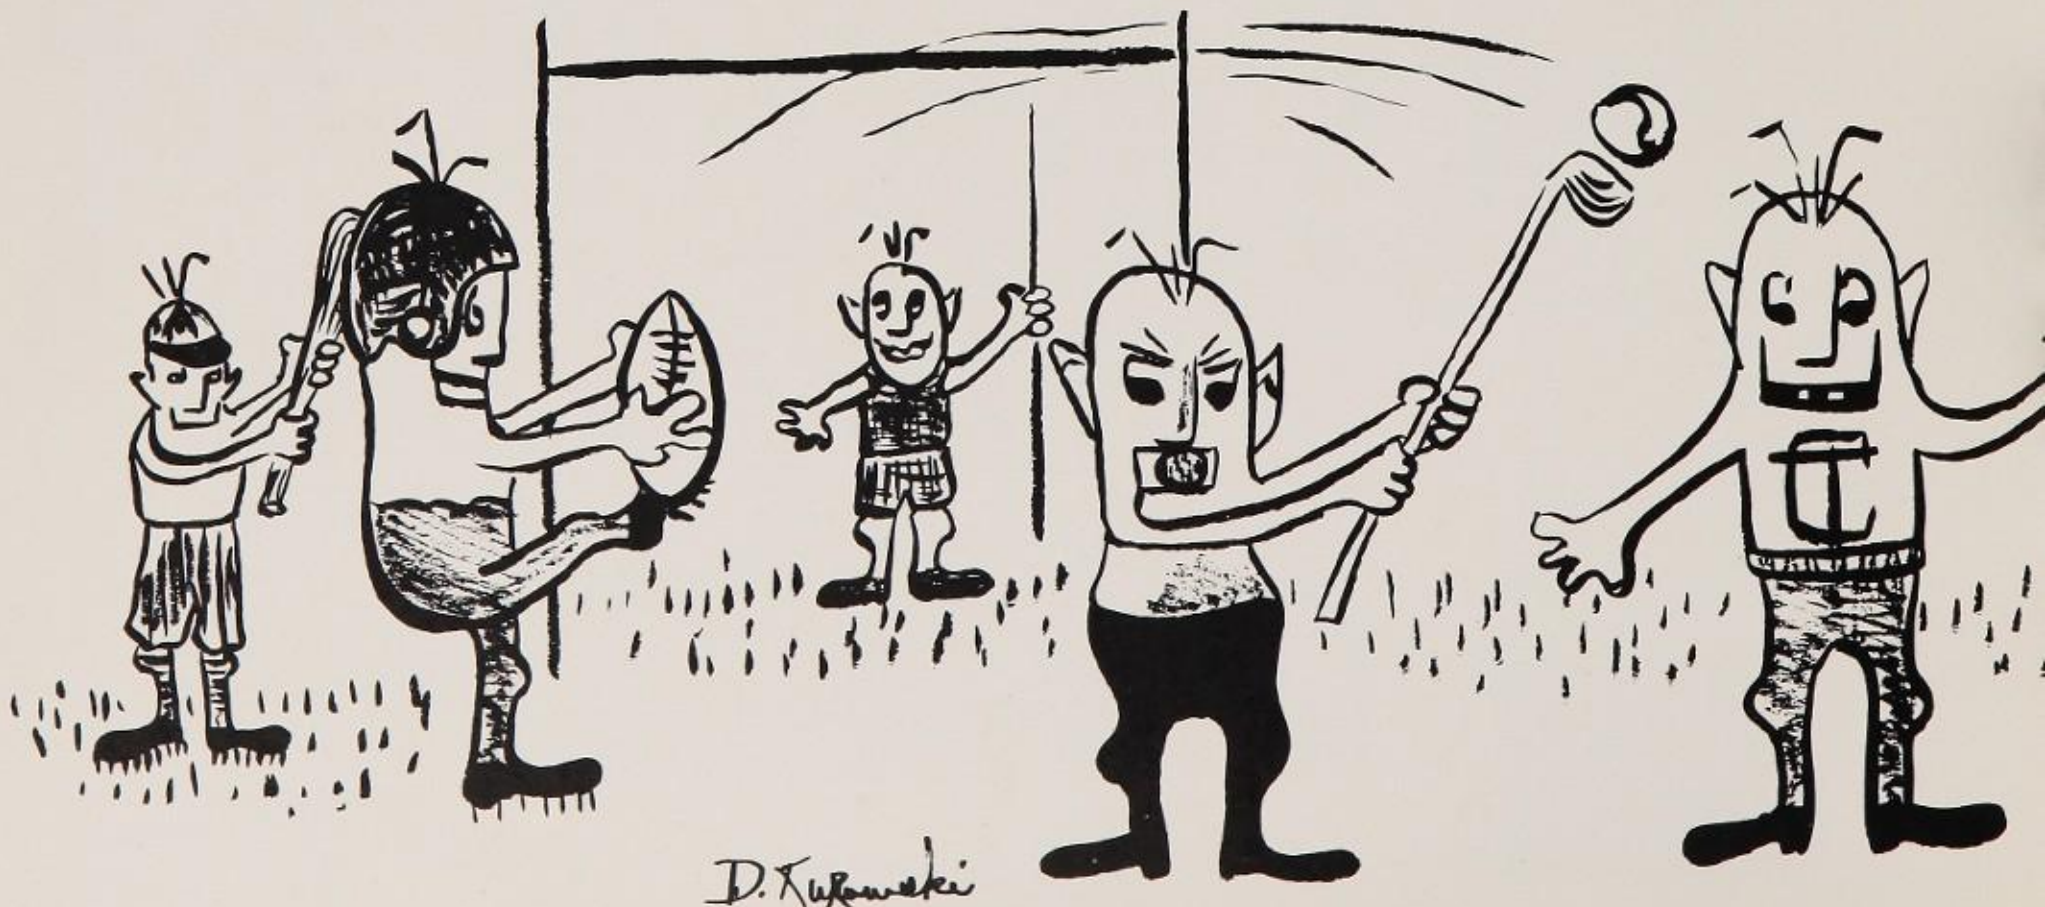

Sportsmanship Code

We consider all athletes as our guests. We will accept all decisions of the officials. We do not utter abusive or irritating remarks or attempt to rattle an opposing player. We applaud opponents who make good plays; or show good sportsmanship. We strive to win fairly without boasting and lose without excuses. We ask that all players and fans help us live up to this code and so — "May the Best Team Win!"

School Clubs

Siz! Boom! Bah! Rah! Rah! Rah! The cheerleaders are at it again. They're giving three cheers not only for the Lettermen and Letter-girls but for all of the clubs in the school. We sure have a fine assortment of them here at Cass. One to fit every individual taste, as a matter of fact. So come on gang, get on the bandwagon and join your fellow students in one of the many clubs.

For all of you scientists, we have just the thing. Hydrogen sulfide, formaldehyde and lots of good fun in the form of the Biology club, Boys' Chem club and Girls' Science club. Requirements for all are a B average, in a science class, and a genuine interest in the field.

If you're a real cool refrigeration student, you're sure to enjoy your curriculum's club. It combines the ice box business with social activities and various trips. Congrats, boys, for having the only curriculum club with 100 per cent membership.

The Wright brothers have nothing on them. Mr. Don Johnson and the Modeleers, that is. They design and build their own model airplanes. And they really fly! The boys learn theory, flight characteristics and have lots of fun. Requirements??? Love for airplanes and a desire to build them.

Who ever heard of a car that talks? No one, I suppose, but those Auto Aero boys sure do a lot of talking. A five minute speech is required for each initiate. In addition, prospective members must attend three consecutive meetings, have passing grades and must have been a Cass Auto Aero student for at least one semester.

Funny how red hair seems to go with electricity. You don't think so? Well, it's a good way to introduce the Electronics club sponsored by fiery-haired Mr. Applebaum. You might say the club began way back with Benjamin Franklin and his kite. Really, though, it's only been at Cass about thirty years. The Electronics club is technical, not social, and is open to any tenth, eleventh, or twelfth grade student who has a C average and a genuine interest in Electronics. Amateur radio is very popular among the members, but the club is not devoted to this one certain phase of Electronics.

Station C A S S broadcasting. Station C A S S broadcasting. Do you like radio, television, fun and excitement? Then the Radio Speech club is just for you. The club is open to anyone willing to exchange hard work for relaxation.

"Coming in on a wing and a prayer." I suppose that's the feeling you get when you're floating around in space in a sailplane (glider or airplane without an engine). The feeling doesn't seem to bother the Cass Condor Soarers, though. Originally a part of the Auto Aero club, the Condor Soaring club has similar entrance requirements and a similar initiation. The club is different in that it is open to everyone.

Checkmate! A word to gladden the heart of any chess player except the loser. This and other chess jargon can be heard at the weekly meeting of the chess club. Anyone is welcome to join the club, even those who do not play. Old members are glad to help someone learn the game.

A.A. could stand for automobile association, Alcoholics Anonymous or as it does in this case, for Advertising Art. The club is open to Art students who have been at Cass for one semester. Prospective members must have a C average and be carrying a 5 credit hour art class.

"Around the world"—theme for the International Friendship club. Members of this club usually have several pen pals in various countries and enjoy traveling, collecting souvenirs and learning about different countries and their cultures.

Three, two, one, swoom! The Rocket Technology club is one of the newer organizations of Cass. The club is open to anyone with passing grades who can get through the initiation which consists of a 5 minute technical talk on rocketry. Another requirement is attendance at three consecutive meetings. The club attends lectures and demonstrations having to do with rocketry.

Rome wasn't built in a day. That's because the Architectural club was not in existence then. The club offers social activities and trips to the members of the Architectural curriculum. A C average is required for admittance.

A discussion is an exchange of opinions and that's exactly what the Discussion club does when its members get together to talk over anything of interest or importance. The club has no requirements as to grade or curriculum.

Teamwork, friendship and co-operation are the purposes of the Cass Caperettes, a home ec sponsored club. A girl has to be a home ec student for at least one semester and have a C average before becoming a member of the club.

Students elect the members of the student council, junior governing body of the school. There is one representative for every 100 students in each curriculum.

Special requirements are necessary to join the National Honor Society. Membership is based on scholarship and school activities and service.

Other clubs are: Cass Bowlers, Classic Discussion, Creative Writing, Future Teachers, Harp and Vocal, Future Engineers, Photography, Star Delta, Teen Age Book, Wapika and Pre-med.

In addition to the various clubs there are classes for each respective grade.

Please emphasize to your homeroom students that if they drive a car to school, they are not to park in the area near the N.W. entrance to the building. In the first place it is a fire-hazard and secondly, the permissible places for parking in that area have been assigned to certain individuals. If the students fail to comply with this request, it will be necessary to have the police ticket the cars illegally parked.

Congratulations to the seniors who are graduating this year, and I hope they will be as proud of their yearbook as the Triangle staff is. We have done our utmost to present a book which may bring back pleasant memories of their high school years.

I'd like to thank my staff for the help that they have given me in the making of this book.

Cathleen Shaw deserves a lot of credit for the various jobs which she did and the encouragement she gave me.

I was very happy to have Marge Teramino and Pam Plager to manage the business transactions and books. Gordon Mayer, our sports editor, did a lot to put together the pages on sports and the names for the pictures.

Faculty editor, Rita Lichtman, did a fine job in preparing the faculty pages of this book.

Our art staff Gerald Mc Dermott, Leonard Pitt and Allie Mc Ghee are to be congratulated on the splendid job on the cartooning of which we here at Cass are so familiar with. Also a new member Diane Kurowski deserves a special medal for the last miunte cartoons which she did so well.

Typists Elaine Jankowski and Rosemary Nagy are almost the most important part of the staff, and I would like to commend them for their fine work.

Thanks also to the faculty for their patience and co-operation and also to Mr. Heft, our principal. My deepest appreciation goes to Mr. Obel, without whose encouragement this yearbook might not have been completed.
